Professional Summary

Motivated and detail-oriented Computer Science graduate with hands-on internship experience in Oracle Database Administration and Python development. Proficient in Oracle 19c, SQL tuning, and shell scripting. Adept at solving problems, managing users and backups, and working in Linux environments. Eager to contribute to database performance and security in a challenging role.

Skills

- Oracle 19c / Oracle Installation
- SQL
- RMAN / Backup & Recovery
- Linux / Windows
- Patching / Shell Scripting
- Performance Tuning
- User Management
- Export / Import
- Python, Git
- HTML/CSS/JS (Basics)

Experience

Oracle DBA Intern - Lernomate Technology

Feb 2025 – Jul 2025 | Pune, Maharashtra

- Resolved user access and privileges on DB objects.
- Created schema diagrams and optimized SQL queries.
- Implemented RMAN backup/recovery strategies, reducing simulated recovery time by 30%.

Python Development Intern - Code Alpha

Nov 2024 – Dec 2024 | Lucknow, UP

- Debugged and optimized code in Python..
- Automated reporting with custom Python scripts.
- Created a portfolio tracker and a mental health chatbot using Python with modular design.

Education

B.Tech in Computer Science

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

CGPA: 7.5 | July 2025

Certifications

- **OCI 2025 Certified AI Foundations Associate** - Oracle University
- **Oracle DBA** - Lernomate Technology
- **Python** - Electrocus Pvt Ltd
- **SQL (Basic & Intermediate)** - HackerRank

Projects

Aptotagger-project: Aptos Pune Hackathon

- Developed a full-stack dApp on Aptos blockchain to auto-tag, index, and visualize on-chain events using Move smart contracts and React-based frontend.
- Implemented auto-tagging algorithm to categorize events by type, sender, and payload—enabling instant filtering and insights.
- Integrated Petra wallet for seamless user authentication and transaction signing, ensuring smooth UX across all flows.
